

WASHROOM HYGIENE

Clean hands with added protection

Choose a safe pair of hands for your washroom

Promoting a clean-hands environment is one of the simplest ways to prevent the spread of infection. Cannon Hygiene's range of soaps and sanitisers eliminates 99% of germs and provides an enhanced barrier of protection against cross-contamination.

Soaps & hand sanitisers

Our soaps, which are also anti-bacterial and dispensers provide highly effective hand sanitation. Available as manual or automatic models and in small and large sizes, they're fitted with hermetically sealed pouches and one-way valves, and with either hand sensors or anti-microbial levers to prevent cross-contamination and the spread of germs.

Where hand-washing is not available – on the factory floor or in a waiting room – or if extra protection is required, after handling door or flush handles for instance, our sanitisers provide an additional safe and efficient clean-hands solution.

Choose Cannon Hygiene soaps and sanitisers to:

- Actively eliminate 99% of washroom germs ✓
- Control infections with soaps and sanitisers people like using ✓
- Enhance personal protection with sanitiser/soap combinations ✓
- Promote a healthier workplace with reduced illness ✓
- Implement a more hygienic washroom experience ✓

The Cannon Hygiene Guarantee dispenses with 99% of germs and the risk of cross-contamination by promoting a hands-free washroom.

To find out more about our safe hands service or any of our washroom services just call 0860 22 6000 or visit www.cannonhygiene.co.za
